

ClubWorkTrac is a 100% club customized online software module for self-help clubs that require members to contribute hours to complete tasks and jobs as per their club membership rules. ClubWorkTrac efficiently streamlines the process of automating & reporting thereafter all such tasks. The member updated software totally automates the process of listing jobs & improvements for completion to the clubhouse & dockyard.

ClubWorkTrac totally automates the detailed process of selecting and assigning tasks to a member with appropriate skill, tracking of multiple hours from multiple members required to complete such task, & tracking the hourly contributions required from each member. The module can easily be customized or modified to suit the requirements of each club.

The solution is provided as a password secure 24/7 online module accessed directly from your club website. The module will adopt the identical look & feel of the existing club website. Access can either be granted once the member is logged into the club website, or can reside as an independent password secure service.

Full reporting and data export functionality exists for tie in back to any existing club management and/or accounting software.

Cost for this service is \$200 plus hst per month.

Project & Job Administration & Reporting

The system supports delegation (if required) of both "Projects" and single "Job" or "Task" management.

Club Managers can set up Projects and delegate responsibility for creating and managing Tasks to certain supervisors.

External email & internal messaging is fully supported for communication regarding Projects & Tasks, and for confirmation when Members sign up to contribute their hours.

Reporting is in Real-time providing an efficient up to date overview at any time.
